

HARDHAT PINS / PROBE POINTS

Hardhats are the drivers behind maximizing the full mating cycle potential of Fuzz Buttons®. With the added advantages of stack-up retention and automatic solder mask wiping, the Fuzz Button® / Hardhat contact system combines unsurpassed quality, value and performance.

Technical Specifications

Applications	BGA, LGA, CGA, QFN
Pitch Capability	.5mm and Above
Current Capability	10 Amps Continuous
Operating Temperature	-60°C to 200°C
Actuation Lifecycles	500,000+
Standard Material	Au/BeCu

Available Styles

Crown Tip

Applications: BGA
Diameters: .010", .015", .020", .030"

Serrated Tip

Applications : LGA, QFN, CGA
Diameters: .020", .030"

Flat Tip

Applications: LGA, QFN, CGA
Diameters: .010", .015", .020", .030"

Point Tip

Applications: LGA
Diameters: .020"

Spherical Tip

Applications: LGA
Diameters: .020", .030"

Markets

Aerospace
Military
Medical
Communications
Semiconductor
RF / Coaxial

Applications

Interconnects
Connectors
Test Sockets
Test Fixtures
Grounding
Probing

Custom Interconnects

For over twenty years, the exclusive supplier of high performance Fuzz Button® interconnect solutions to military and commercial customers worldwide.
